De-gan Zhang, and Xiao-dan Zhang, A New Service-Aware Computing Approach for Mobile Application with Uncertainty, Appl. Math. Inf. Sci. Vol. 6, No. 1, 9-21 (2012)

Received 12 Feb. 2013

Published 13 Feb. 2013

This is a Retraction for the article Appl. Math. Inf. Sci. Vol. 6, No. 1, 9-21 (2012)

It has come to the attention of NSP that this article should not have been submitted for publication because of its substantial replication without citation of earlier-published papers: De-gan Zhang, Research on context-aware computing for proactive service, *International Journal of Modeling Identification and Control*, **8**(3), 248-255 (2009); De-gan Zhang, Hua Zhang, Hong-yun Ning, Approach of Context-Aware Computing with Uncertainty for Ubiquitous Active Service, *International Journal of Modeling Identification and Control*, **8**(1), 10-17 (2009).

The overlap is substantial, to the point that this paper is clearly an act of self-plagiarism. It is unfortunate that this was not detected before going to press. Consequently, this paper has been retracted by NSP.
