### Teacher interview

Janson, Kimberly. First grade teacher, Wilder elementary school.:

"We use technology to assist our students with math and reading. Dreambox (math) and Lexia (reading) are programs that monitor the students' levels and progress. These programs are individualized learning programs designed to supplement what we are working on in the classroom".

### Recommendations

I have many students who have problems developing their reading skills and I find that the Lexia Reading Program has helped develop reading skills for students in American schools. According to the research that has been carried out it has been shown to improve students' reading ability. I really recommend this program for schools in Saudi Arabia.
